

## Alba

Absorbent carpet entrance matting to protect interior floor surfaces

- Adaptable carpet entrance matting for high volume entrance areas, walkways and corridors.
- Nylon pile is highly absorbent and also withstands crushing.
- Suitable for glue down, wall to wall, or floor surface applications.
- Available with optional edging depending on the requirements of the application.
- Can be used as part of a two-step system in heavy traffic environments.
- Exceptionally durable carpet made from ECONYL<sup>®</sup>, a recycled nylon material made from discarded fishing nets and other sources.
